# ThreatGEN® Red vs. Blue
For Incident Response (IR) Tabletop Exercises

Make Your IR Tabletop Exercies More Effective, Interactive, and Fun!

Cybersecurity IR exercises are a critical part of operational and incident preparedness. When the time comes to respond to an incident, the only way to be sure the necessary personnel will perform effectively, is through practice and exercises. Exercises also expose potential flaws in your procedures.

IR tabletop exercises have been using paper, PowerPoint slides, and spreadsheets for a long time, and these methods have limited effectiveness. Due to the critical importance of IR tabletop exercises and with the technology available to us today, it's time to modernize the entire approach. ThreatGEN® Red vs. Blue uses game-based cybersecurity simulations to create a much more immersive, interactive, and quite frankly, a more entertaining training experience. Our Active Adversary Simulation™ technology provides organizations with a much more realistic training experience, as your team works against as an active threat attempts to counter your team's every move as the exercise unfolds.

ThreatGEN® Red vs. Blue allows facilitators to spend less time planning and managing exercise scenarios and logistics, and spend more time on what's important… educating and training your team!

ThreatGEN® Red vs. Blue for IR Tabletop Exercises Features & Benefits:

- ✓ **Interactive, visual environment** – No more paper, slides, or spreadsheets
- ✓ **IR tabletop exercise "in a box"** – Choose your network environment, choose your scenario, and let the computer AI do the rest!
- ✓ Multiple **built-in scenarios and "injects"**
- ✓ **Easy to use** – Point and click, pre-defined actions
- ✓ **Easy to facilitate** – Scenarios, rules, and mechanics are managed and enforced by the game engine
- ✓ **"Facilitator-less", active adversary mode** – Play against the computer "AI" for a fully automated exercise, without the need for a facilitator
- ✓ **Guided IR tabletop exercise** – Guided exercise with accompanying on demand video
- ✓ Performance **scoring, metrics, and analytics**
- ✓ **Customization available** – We can customize scenarios and network environments to meet your specific needs
- ✓ **Professional support**
